

ENERGY & ENERGY MARKETS — PROFILE BRIEF

Alhassan Abdulai · abdulaia549@gmail.com

Positioning

Energy access, energy markets and transition professional who translates technical evidence into programme design, partner materials and market-infrastructure decisions. Recent delivery spans Sustainable Energy for All (SEforALL / ACMI), industrial CCS and UK ETS analysis (Peak Cluster), and Africa-facing energy-developer engagement.

SEforALL — High Integrity Project Development (Mar–Oct 2024)

Confirmed by SEforALL reference (Principal Carbon Markets Specialist): supported quantitative and qualitative analysis for the Carbon Hub; prepared reports and presentations; led research inputs on methodology development for sustainability initiatives including fossil-fuel displacement; assisted proposals, frameworks and stakeholder communication. Selected public-facing workstreams:

- Diesel genset displacement / DRE replacement methodology research for Nigeria-focused clean energy pathways (ACMI–SEforALL workstream).
- Mission 300–aligned analysis on how carbon-market and integrity infrastructure can support large-scale electrification pipelines.
- Digital platform / Carbon Hub delivery supporting onboarding of 50+ Africa-based renewable energy project developers within a USD 45,000 budget envelope.
- VVB readiness assessment inputs informing clean-energy market infrastructure strategy; fundraising proposal drafting for continent-wide capacity programmes.

Energy markets research — Peak Cluster CCS (MESPOM thesis, 2026)

- Benchmarked industrial CCS abatement economics for a UK cement/industrial cluster against UK ETS pricing — policy incentives, viability and public perception.
- Produced executive research brief, thesis abstract and reproducible analysis figures (pipeline corridor mapping and cost pathways).
- Coursework foundation: Energy Markets · Energy Transition · Environmental Policy · Quantitative Methods (Erasmus Mundus, Distinction GPA 3.73).

Recognition (energy-relevant)

- Schneider Electric Go Green Challenge — Global Winner (2025): technical lead on a distributed renewable energy project for rural farming.
- Stanford Global Sustainability Challenge — Top 6 (2026).
- Erasmus Mundus Scholarship (2024).

How to use this brief

This document summarises energy consultancy-relevant delivery for recruiters. It does not reproduce confidential SEforALL contracts, MoUs or internal working files. Supporting public downloads: Peak Cluster research brief and thesis abstract on the Energy portfolio site; full CV available as PDF/Word.
